

## Sharing Google Doc Links

If you are sharing a Google Doc link with your study group, be sure that anyone with the link can view it.

In Google Drive, when you right click on a document and select "Get Link", you will see a drop-down box that says either "Restricted" or "Anyone with the link". If "Restricted", only people added (in "Share with people and groups") can open the link. **Change to "Anyone with the link"** (Anyone on the internet with this link can view).
